INTERNSHIP

MERN Stack – ALGO TURTOR	2025
Designed a Task Manager application. Users can leverage CRUD (Create, Read, Update, and Delete) functionality to manage their tasks effectively. Used cookie validation to securely store essential data, such as user types.	
Tech stack: Node JS, React JS, Mongo DB, Express JS	

PROJECTS

EXPENSE TRACKER-Intelligent Expense Tracking and Budget Monitoring Platform	2024
Developed a full-stack Expense Tracker application to record, categorize, and analyze financial transactions. Implemented secure APIs, budget tracking, and interactive dashboards using Python, Django, PostgreSQL, and React to enhance financial planning and spending insights.	
SMART HELMET-Smart Helmet for Real-Time Accident Detection and Emergency Response	2025
Developed a smart safety helmet with accident detection, gas sensing, GPS tracking, and Bluetooth connectivity. Implemented real-time emergency alerts and a manual SOS feature using Java-based backend logic and embedded systems integration.	
SMART IRRIGATION SYSTEM-Precision Irrigation System with Environmental Monitoring	2025
Developed a Smart Irrigation System backend using Spring Boot and MongoDB to automate irrigation based on real-time soil moisture data. Implemented REST APIs for sensor management, scheduling, and water usage, ensuring a scalable and maintainable architecture with Gradle.
